

## Propane tanks

Propane tanks from backyard grills can be dropped off during DPW Recycle Day.

Propane tanks over 20 pounds or other types of gas tanks will not be accepted.

Save the Town money-if you just have a propane tank to dispose bring to DPW Recycle Days instead of HHW Days.

**Please note that helium tanks will not be accepted.**

Think twice about buying balloons and helium tanks, both are not environmentally friendly. Balloons, even biodegradable ones cause litter when they are released outside, eventually falling back down in waterways, fields, and forests. Once on the ground they can harm wildlife and marine animals before they SLOWLY breakdown.

Tanks that store helium can't be put in the trash or collected by the Town. Need to find a scrap metal recycler.
