Re: **CHA Amendment for Sampling Clay Pit Pond - UPDATED**

Dear Sir:

CHA is hereby submitting a fee proposal for additional services to perform sampling of the water in Clay Pit Pond as discussed with the Town Administrator's office, the Town's Board of Health, and their water quality experts. We will be engaging McPhail Associates who will assist in collecting the water samples and they will be using a third party to perform the laboratory testing. We understand the Town of Belmont, with their consultants, will be performing the risk assessment based on the testing data provided by McPhail Associates. This additional scope for McPhail Associates will be a continuation of their Geotechnical and Geo-environmental services on the project.

The fee adjustment to CHA's contract would be:

McPhail's Budget 9/6/22	\$32,000.
CHA 5% Mark Up on Consultant	<u>\$ 1,600.</u>
Total for CHA Amendment	\$33,600.

This is based on one set of samples only – if additional sampling is required for differing conditions, the added cost will be addressed based on the revised criteria.

If you have any questions on the above, please let me know.

Very truly yours,

Donald White

Donald E. White
Sr. Project Manager

This cost not voted for approval

Committee voted and approved to provide irrigation water for field watering with a direct connection to the municipal (MWRA) water supply rather than the current scope of drilled wells or the option to utilize Clay Pit Pond water
