

Have your system inspected every 1 to 3 years

Pump out the tank every 3 to 5 years

Keep records of maintenance, service, and pump outs

Limit garbage disposal use and put used cooking fat, oil and grease in the trash

Stagger use of washing machines and dishwashers

Use water saving shower heads and low-flush toilets

Only human waste and toilet paper should go down the drain

Keep cars off of the drainfield

Plant only grass on the drainfield

5 SIGNS YOUR TANK NEEDS CLEANING

Pooling Water
You might have a clog in the system or a full tank.

Overly Healthy Lawn
If your lawn is greener over your septic field, your septic system might be overflowing.

Foul Smell
If you notice a bad smell, you should have your system checked.

Slow Drainage
If the water drains slowly, it might be time for the system to be serviced.

System Backup
If your system is full, smelly sludge might come out of your plumbing fixtures.
