**1. Continued Design Discussion, Presentation:**

- E. Bradford began TAT's PowerPoint presentation of the current development project. E. Bradford's comments included:
  - Phase 2 ties between all McLean developments
  - The eclectic blend of all buildings on the McLean Campus
  - Selection of materials, showing surrounding building materials
  - TAT looked to the de Marneffe / Administration buildings as precedent
  - Photos of materials
  - Link between materials of the Chapel to the mid-rise buildings
  - Examples of town home precedents
  - Proposed mid-rise roofs compared to existing campus buildings
  - Chapel: placement of garage is not random; topography was considered as well as centered on the four dormer windows of the Chapel

**Discussion:**

- J. Dawley pointed out HDC concerns about gable roof of the Chapel garage
- M. Breau said regarding the garage, the use of similar materials, sympathetic to the style of the Chapel. TAT believes the garage reads as secondary. TAT does not believe a flat roof on the garage for homeowners and the street experience.
- J. Dawley asked what are the next steps?
- C. Solander stated we are still where we are with comments regarding the issues and concerns of the Chapel garage.
- S. Clarke commented that TAT has not allowed the garage to compete with the Chapel, this is a good thing.
