PUBLIC HEALTH WEEKLY UPDATE:
COVID-19
January 15, 2021

Below is a summary related to the Town of Belmont's response to the COVID-19 (Coronavirus) pandemic. The Town of Belmont is committed to providing information including this weekly update on the COVID-19 situation. Numbers related to COVID-19 and other pertinent information are updated regularly on the [Town's website](#).

The Town of Belmont currently has 799 *cumulative* confirmed cases of COVID-19, which is an increase of 62 cases since our January 8 report. There have been a total of 74 COVID-19 related deaths to date for the Town of Belmont, all of which are confirmed by filed death certificates with the Town Clerk's Office. Due to the new case count over the past two weeks, this puts Belmont in the **Yellow** zone according to the new color designation metrics (≥ 10 average cases/100k OR $\geq 5\%$ Positivity, as reported in the last two weeks).

The Massachusetts Department of Public Health (MDPH) continues to provide weekly reports of COVID-19 data by city or town as part of its [Dashboard for COVID-19 Cases, Quarantine and Monitoring](#). MDPH updates this list once a week on Thursdays.

COVID-19 Information and Vaccine Survey

The Belmont Health Department is conducting a brief survey about how it can best share information about COVID-19 and the eventual availability of vaccines to the community. Please take a moment to complete our survey. At the end of the survey there is a section you can complete to indicate if you would like to be added to our email list for updates about the availability about vaccines locally.

Belmont Health Department survey: <https://forms.gle/6Dzz3pcj4sgSsmKGA>

Reporting COVID-19 Deaths for the Town of Belmont

A recent year-end review of official death records maintained by the Belmont Town Clerk's Office revealed 13 additional Belmont deaths attributed to COVID-19 in 2020. (Since the beginning of the New Year there has been one new death related to COVID-19.) This brings the town's total COVID-19 death count to 74 residents.

It is important to note:

- COVID-19 deaths have disproportionately impacted the older members of our community, with the average age of death being 84.9 years old.
- 22 of these deaths occurred among community members who were not associated with a local long term care facility.
- There have been 10 Belmont residents who have died from COVID-19 since Thanksgiving. None of these residents were associated with the local long term care facility.

The Town Clerk's Office will continue to provide information for COVID-19 death statistics; the data will contribute to the town's COVID-19 dashboard on Fridays.

COVID-19 Reporting Issues in MAVEN

The Massachusetts Virtual Epidemiologic Network (MAVEN) is the system used statewide to track and follow up with COVID-19 cases and contacts. Due to the scale of the pandemic and the constant influx of information into the system, the town designation of COVID cases is sometimes changed as more is learned about each case. This can be due to employment, if they attend college, or where they are going to isolate. This sometimes leads to discrepancies in the numbers reported weekly by the state, as they might report the numbers either before or after cases are moved to their rightful town. This is why the data that the town of Belmont reports may differ from what the state reports. The Belmont Health Department looks at the most updated data that is available every day, to ensure that we are reporting the most current numbers for the town.

Belmont Town-Level COVID-19 Dashboard

Find the Dashboard at the top of the town COVID-19 Page: <https://www.belmont-ma.gov/home/urgent-alerts/covid-19-information-for-the-town-of-belmont-find-all-updates-here>

Belmont Public Schools COVID-19 Dashboard

Find the Dashboard at the top of the town COVID-19 Page: <https://www.belmont-ma.gov/home/urgent-alerts/covid-19-information-for-the-town-of-belmont-find-all-updates-here> - Or on the Belmont Public Schools Website as a banner on the home page

***Note:** As of Friday, December 11th, the Town has temporarily suspended all appointments for in-person visits to Offices in the Town Hall and Homer Buildings.

The COVID-19 Vaccine

The Town of Belmont is monitoring the availability of COVID-19 vaccines and preparing for the eventual vaccination of the general public. The Massachusetts Department of Public Health is charged with determining the distribution plan for the vaccine in the state. The Town is currently awaiting direction from MDPH to update and activate its emergency dispensing plans in anticipation of a large-scale effort to vaccinate residents with a COVID-19 vaccine.

At this time, Massachusetts is currently in Phase 1 of its [vaccine distribution plan](#), and vaccines in Massachusetts are reserved for individuals in the first four priority groups in Phase 1: healthcare workers doing direct and COVID-facing care, employees and residents of Long-Term Care facilities, first responders, and individuals who work or live in congregate care settings. Vaccine requests for these groups are being approved and overseen by the state.

Additional information about COVID-19 vaccine planning and distribution for the Town of Belmont is available at the top of the Town of Belmont COVID-19 information page here: <https://www.belmont-ma.gov/home/urgent-alerts/covid-19-information-for-the-town-of-belmont-find-all-updates-here>

Understanding Quarantine and Isolation

As cases rise in Massachusetts, it is important to make sure everyone understands and can prepare for the possibility of you or a loved one needing to quarantine or isolate.

Quarantine is for individuals who have been exposed to COVID-19, but are not sick and have not tested positive. Quarantine is typically 14 days long. While the CDC and DPH have released guidance for shortened quarantine under certain circumstances, the town of Belmont continues to recommend that individuals who have been exposed to COVID-19 complete the full 14 day quarantine to help stop the spread and practice maximum prevention.

Isolation is for individuals who are sick or who have tested positive for COVID-19. Isolation is typically 10 days long, but may be longer if you develop severe or lingering symptoms.

If you test positive for COVID-19, or someone you've been close to tests positive, expect a call from one of our contact tracers. The call may not come from a local number, but it's important to answer the phone. If you miss the call, contact tracers will leave a voicemail, please call us back if you receive a message from us. Contact tracing helps to slow the spread of COVID-19 and we all need to do our part as cases rise in Massachusetts. Our contact tracers will help ensure that you and your family know what to do during quarantine or isolation, and make sure you are aware of the resources available to you during this time.

In both quarantine and isolation, you must remain in your home, and remain separate from anyone you share a household with. Preferably, not utilizing any common areas, like living rooms and kitchens, and using separate bathrooms wherever possible.

When you are quarantined/isolated, you cannot leave your home unless you are seeking urgent medical attention or a COVID test. Some tips for getting your needed supplies are as follows:

- Utilize grocery delivery options
- Have a family member or friend pick up groceries/other supplies and do a contact-free drop off on your doorstep
- Belmont has some resources to help bring supplies to those who have to stay home, ask your contact tracer if you need assistance with this

If you haven't already, take the time to discuss with your family or household your plan for potential quarantine and isolation situations. Think about how you will get things like groceries, prescriptions and other necessities, and if there are others in your community you might offer to help if they go into quarantine or isolation as well.

More information on isolation and quarantine can be found here: <https://www.mass.gov/info-details/tips-to-make-covid-19-isolation-and-quarantine-easier>

Further COVID-19 Prevention Measures

Governor Baker announced that Massachusetts would implement some further restrictions to prevent the spread of COVID-19, effective Saturday December 26th, and has been extended at least through January 24th, 2021. Full information on this update can be found [here](#) and [here](#).

Capacity Limits

Effective Saturday, December 26, most industries in Massachusetts are subject to a 25% capacity limit including:

Sector	Current Capacity Limit	New Limit
Construction	None	None
Drive-In Movie Theaters	None	None
Laboratories	None	None
Manufacturing	None	None
Restaurants	None	25% of seating capacity
Close Contact Personal Services	None	25%
Indoor and Outdoor Events	25 indoor / 50 outdoor	10 indoor / 25 outdoor
Theaters and Performance Venues	Movie theaters – 40%, max 50 people Indoor performance venues – Closed Outdoor performance venues – 25%, max 50 people	Movie theaters – 25%, max 50 people Indoor performance venues – Closed Outdoor performance venues – 25%, max 25 people
Office Spaces	40%	25%
Places of Worship	40%	25%
Retail Businesses	40%	25%
Driving and Flight Schools	40%	25%
Golf Facilities	40%	25%
Libraries	40%	25%
Operators of Lodgings	40%	25%
Arcades & Other Indoor & Outdoor Recreation Businesses	40%	25%
Fitness Centers and Health Clubs	40%	25%
Museums / Cultural & Historical Facilities / Guided Tours	40%	25%
Sectors Not Otherwise Addressed	40%	25%

Workers and staff will not count towards the occupancy count for restaurants, places of worship, close contact personal services, and retail businesses.

All other rules and restrictions in each sector-specific guidance will remain in effect.

Gatherings Limit

Effective Saturday, December 26, the gatherings limits will be updated. Indoor gatherings will be limited to 10 people. Outdoor gatherings will be limited to 25 people outside.

The gatherings limit applies to private homes, event venues and public spaces.

Elective Surgeries

The Department of Public Health released updated guidance to hospitals around nonessential, elective invasive procedures. To preserve health care personnel resources, effective 12:01am on December 26, all hospitals are directed to postpone or cancel all nonessential inpatient elective invasive procedures in order to maintain and increase inpatient capacity. Hospitals shall make every effort to preserve their inpatient capacity by cancelling nonessential electives and redeploying staff.

Patients are reminded to still seek necessary care at their hospital or from their health care provider.

Return to Phase III Step I

As of December 13, all communities are in Phase 3, Step 1 of Massachusetts' reopening plan, including the following restrictions not already covered in the December 26th capacity restrictions:

- Indoor theaters and performance venues and higher contact indoor recreation businesses will be required to close to the public
- Outdoor theaters and performance venues will be limited to 25% capacity, and no more than 50 people
- Musical performances at restaurants will no longer be permitted
- Food court seating must be closed in malls
- Customers are encouraged to dine only with members of the same household
- Offices and Gyms
 - In offices, employees must wear masks at their place of work when not in their own workspace and alone
 - Employers are encouraged to close or limit the use of break rooms
 - Patrons must wear masks **at all times** in gyms
 - The Administration continues to encourage all employers to offer teleworking to their employees when possible.

[Click here to read the order rolling Massachusetts back to Phase III, Step 1.](#)

COVID-19 Testing – Updates and Tips

Project Beacon Sites

In addition to five new Stop the Spread (STS) locations, three current locations will expand to regional testing sites run by Project Beacon: New Bedford, Framingham and Lynn. Project Beacon currently operates a testing site in Revere and specializes in high-volume testing scheduled through an online platform. Each Project Beacon site will test at least 1,000 individuals per day. The sites are expected to be operational by the end of December, with the site in Framingham already operational as of 12/7.

More information on new Massachusetts testing expansion [Here](#). Sign up for testing through Project Beacon [Here](#).

Should I be tested?

You should get a test for COVID-19 if:

- You develop *any* symptoms of COVID-19, even if they are mild, or
- You are a close contact of someone who has tested positive for COVID-19, or
- You have traveled to a non-low risk state and are returning to MA, or
- You are planning to travel to a state that requires testing prior to arrival

Getting Tested as Cases Surge

As cases continue to rise in Massachusetts, here is some updated information if you are seeking COVID-19 testing for yourself or your family.

- [Stop the Spread \(STS\)](#) sites continue to produce efficient test results, typically within 24-72 hours of your test
 - But with the higher rates of testing, you may face delays in receiving your test results from any testing location
 - Lines at STS locations have increased with the higher need for testing for those who have symptoms, who may have been exposed, or who have or are planning to travel
 - Be prepared to wait for one or more hours at the drive through and walk up locations
- You can alternatively seek an appointment at one of the STS sites that offers them, or from one of the other types of testing sites
 - Other testing sites include urgent care locations and pharmacies – the online testing map will identify what type of testing sites you’re looking at while searching your area

What are the symptoms of COVID-19?

If you develop symptoms of COVID-19, even if they are mild, please contact your healthcare provider and a test site near you to schedule a test. You can also [check your symptoms online](#).

Symptoms may appear 2-14 days after exposure to the virus and may include:

- Fever, chills or shaking chills
- Signs of a lower respiratory illness (e.g., cough, shortness of breath, lowered oxygen saturation)
- Fatigue, sore throat, headache, body aches/myalgia, or new loss of sense of taste or smell
- Other less common symptoms can include gastrointestinal symptoms (e.g. nausea, vomiting, and diarrhea), rash, and inflammatory conditions such as “COVID toes”.
- In elderly, chronically ill, or debilitated individuals such as residents of a long-term care facility, symptoms of COVID-19 may be subtle such as alterations in mental status or in blood glucose control

Where can I get a test?

Please visit the Massachusetts [interactive testing map](#) to find a testing site near you.

You can also download a full list of sites: [MA COVID-19 Testing Sites PDF](#) | [DOC](#)

Information continues to evolve quickly, so we encourage all those looking to be tested to contact the site prior to arrival. Many sites may also require pre-screening, a referral and/or an appointment.

Is there a cost?

COVID-19 testing for symptomatic individuals and close contacts is usually covered by insurance and available at no cost to you. Contact your insurance with questions about if particular testing sites are within your network. Additionally, many test sites in the Commonwealth test uninsured individuals for free. If you are uninsured, please call your local test site to confirm before making an appointment.

Stop the Spread Testing Sites

The Commonwealth has launched a strategic testing program involving free COVID-19 testing sites in communities throughout Massachusetts to help stop the spread of COVID-19.

This “Stop the Spread” initiative is a data-driven effort to reduce the prevalence of COVID-19 in communities that are above the state average in total cases and positive test rate, and have experienced a decline in testing levels since April. The testing sites are located in different cities and towns throughout the Commonwealth. Residents of these communities are urged to take advantage of the availability of these new testing sites, even if they are asymptomatic. While these sites are located in these communities, they are open to all residents of the Commonwealth, and residents do not need to have symptoms to be tested.

You can find additional information about the “Stop the Spread” initiative test sites here:

<https://www.mass.gov/info-details/stop-the-spread>

You can also find a fast fact sheet on Stop the Spread sites in proximity to Belmont at the top of the town COVID page: <https://www.belmont-ma.gov/home/urgent-alerts/covid-19-information-for-the-town-of-belmont-find-all-updates-here>

COVID-19 Testing Reminders:

There are 2 types of COVID-19 testing: Diagnostic Testing and Antibody Testing. Diagnostic testing is the type that tells you if you currently have COVID-19. These tests are typically done using a nasal swab, oral swab, or saliva sample. There are two types of diagnostic tests:

- Molecular tests, such as RT-PCR tests, that detect the virus’s genetic material.
- Antigen tests that detect specific proteins on the surface of the virus.
- Often called “rapid diagnostic testing” – Antigen tests are more likely to miss an active coronavirus infection compared to molecular tests, and may also be more likely to return a false positive result in certain testing situations.
 - Antigen tests should always be followed with a PCR test to confirm the results

Antibody (or serology) testing is the type that helps you find out whether you may have been infected with COVID-19 in the past. This is a blood test that looks for antibodies, which are proteins in your blood that fight infections. Antibody testing is important to help us understand how many people have been exposed to the virus.

- Important to know: at this time, most people don’t need antibody tests and they should not be used to guide decisions on whether to stop isolation or return to work. Currently, there is no proof that antibodies in your blood means that you are immune from further infection with COVID-19.

*Under the August 1 travel requirements, the test that is required to forego your 14 day quarantine is PCR Testing. Make sure to inquire about which test you are receiving at the testing site, as the antigen or antibody tests cannot be used as a replacement for molecular/PCR testing. More information on types of testing can be found on the FDA’s website [here](#).

Updated: Calculating our Color-Coded Status

The way that Belmont's color is determined for the weekly data is by the average daily case rate per 100k people over the last 14 days. Recently, the metric for switching between colors was updated by the Massachusetts Department of Public Health (MDPH). Now in order for Belmont to hit the threshold for shifting to red for example, we would need to have an average of 10 or more cases per day per 100k people over the last 14 day period, AND have greater than or equal to a 5% testing positivity rate (The full description of the new metrics for Belmont's population size can be viewed in the adjacent image).

This is calculated and posted along with the case count in the State's weekly COVID community-level data update: (<https://www.mass.gov/info-details/community-level-covid-19-data-reporting>). This week we have an average daily case rate of 41.2 on average per day per 100k people over the previous 14 days, calculated by using the town's population and the number of total new cases in that 14 day period, and a percent positivity of 3.84%.

Another point to clarify, is that the 14 day data is pulled weekly from the previous Saturday, going back two weeks from there. So for example, this week's data represents the previous two weeks, from Sunday 12/27 through Saturday 1/9. This schedule was put in place by MDPH, in order to allow time for cases to be accurately assigned to the correct towns in the database, and for test results to be correctly logged into MAVEN. As mentioned above, MDPH requires time to confirm data in MAVEN, which is the reason for this delay in reported data. The case count, however, posted at the end of each week is pulled from MAVEN that morning, so this number will always reflect the current standing, as does the number of new cases observed each week listed at the top of this document.

Color Calculations- Belmont Population: 10k-50k

Grey: ≤ 10 total cases

Green: < 10 Avg cases/100k
AND > 10 total cases

Yellow - ≥ 10 Avg cases/100k
OR $\geq 5\%$ positivity rate

Red - ≥ 10 Avg cases/100k
AND $> 5\%$ positivity rate

Reminder: Wearing your Mask

Here are some tips about how to properly wear your face coverings, and what type of face coverings are recommended. As a reminder, face coverings are now required when you are outside of your home in public, as per [Governor's COVID-19 Order #55](#). This is regardless of ability to socially distance.

WHO Mask Guidance: <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/advice-for-public/when-and-how-to-use-masks>

CDC Mask Guidance: <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/about-face-coverings.html>

Mask up MA! : <https://www.mass.gov/news/mask-up-ma>

Stay at Home Advisory

The Governor's new Stay at Home Advisory went into effect on November 6, 2020 and consists of the following COVID-19 Orders:

- [COVID-19 Order No. 53](#) – Early Closings and Alcohol Order
- [COVID-19 Order No. 54](#) – Further Revised Gatherings Order
- [COVID-19 Order No. 55](#) – Revised Face Coverings Order

A summary of the important parts of these Orders can be found below:

COVID-19 Order No.53

- The following industries and sectors must close their premises to the public each day by 9:30 PM and they cannot reopen until 5:00 AM the next day
 - **Restaurants*
 - *Arcade and Indoor/Outdoor recreation*
 - *Indoor/Outdoor Events*
 - *Theatre Performance Venues, Movie Theatres (indoor and Outdoor)*
 - *Drive Ins*
 - *Youth and Amateur Sports*
 - *Golf*
 - *Recreational Boating and Boating Businesses*
 - *Outdoor recreational Experiences and Educational Activities*
 - *Casino, Horse Racing Tracks, and Simulcast Facilities*
 - *Driving and Flight Schools*
 - *Zoos, Botanical Gardens, Wildlife Reserves and Nature Centers*
 - *Close Contact Personal Services*
 - *Fitness Centers and Health Clubs*
 - *Indoor and Outdoor Pools*
 - *Museums/Cultural & historical Facilities/Guided Tours*

*Note:

- Restaurants cannot seat customers for dine-in-service from 9:30 PM to 5:00 AM; only takeout service is allowed during this time.
- All alcohol sales at restaurants, liquor stores, convenience stores is prohibited 9:30 PM to 5:00 AM

COVID-19 Order No.54 – Revised Gathering Order

- Reduced gathering size limit for gatherings at private residences: indoor gatherings at private residences are limited to 10 people and outdoor gatherings at private residences are limited to 25 people.
 - *This limit now applies to public and event spaces as well as of 12/26*
- All gatherings must end and disperse by 9:30 pm

COVID-19 Order No.55

- Face coverings are now required to be worn by all persons in Massachusetts over the age of 5 years old, when in a public location, whether indoors or outdoors, and regardless of proximity to others.
 - Anyone with a medical condition that prevents them from wearing a face covering is exempt from this new order.

Indoor Dining Guidance

As cases continue to rise, below is a summary of the state's important [Safety Guidelines for Restaurants](#).

- Face coverings are required for all customers and workers at all times when inside of a restaurant
- There are a couple of exceptions for when a face mask is not required and they are:
 - If an individual is unable to wear a face covering due to a medical condition
 - When a customer is eating, seated at a table, as a part of dine-in service (**As of 12/13, customers may only remove masks while eating inside a restaurant, they must be kept on at all other times at the table**)
- Alcoholic beverages can only be served if accompanied by food prepared onsite
 - Potato chips, popcorn, or other pre-packaged foods are not considered to be food prepared on-site
 - Shareable food items may be ordered, but the order must be large enough to sufficiently serve the number of people at the table

- Tables are required to be set up and positioned in a manner to maintain a 6-foot distance from all other surrounding tables and any high foot traffic areas
 - Tables are allowed to be positioned closer together if they are separated by a protective/non-porous barrier (such as plexiglass) that is at least 6-feet high and installed between tables and high foot traffic areas.
 - The size of a party seated at a table cannot exceed 6 people, and diners are encouraged to only dine with those from their own household
- Bar seating is allowed, but...
 - There can be no active work going on in the area behind the bar, unless workers and customers are separated by at least 6-feet of physical distance.
 - This distance may be lessened if there is a physical non-porous barrier of 30-inches in height on top of the bar that separates the two parties.
 - Additionally, parties must be seated at bars for service (no standing customer service) and parties must be spaced at least 6-feet from other parties.
- Finally, as going out to eat is often viewed as a social event, the state is discouraging people from lingering at food service establishments.
 - Be efficient with the time you spend in a restaurant, **effective 12/13 restaurants must impose a 90 minute dining time limit for tables**
 - Go in and order your food, eat your meal, pay for it, and leave as soon as possible.
 - Tips to help minimize your time inside of a restaurant include:
 - Call ahead to make a reservation
 - Preview the menu ahead of time

Flu Shots for those without Insurance, or who are underinsured

The Belmont Health Department is currently offering flu shots for those who are under or uninsured. These will be given by appointment only. Please call the Health Department at 617-993-2720 if you are interested in scheduling an appointment, have any questions about this service, or for further information.

Lower-Risk States Update

As per the August 1 travel order, there have been states added/removed to/from the lower-risk group that is exempt from testing/quarantine upon arriving into Massachusetts. The current list of lower-risk states only includes Hawaii.

For Full Info on Travel Restrictions and Procedures:

<https://www.mass.gov/info-details/covid-19-travel-order>

Belmont Food Pantry: January/February Hours

The Belmont Food Pantry will be open to distribute food from 8:30 – 10:00 a.m. on the dates listed. The distribution will still be a drive-thru with everyone remaining in their car, pulling up to the volunteer to check in and another volunteer will put the bag(s), per family, into the car. Walkers PLEASE keep a distance from each other and Food Pantry volunteers WILL COME to you. Belmont residents who are coming to receive food, please remember to bring your ID and have it ready before you get to the check in. Click here for the application and instructions:

<https://sites.google.com/.../thebelmont.../home/new-client-forms>

School Flu Shot Requirements

Beginning with the 2020-2021 school year, influenza vaccine will be required for all students. Influenza vaccine is always important to receive to reduce the risk of getting sick with influenza, reduce the severity of disease if one does get sick (including the risk of hospitalization) due to influenza, as well as preventing the spread of influenza to others. During the COVID-19 pandemic, influenza vaccine will be especially critical to reduce the overall impact of respiratory illness on the population, protect vulnerable populations from severe illness, and decrease the overall burden on the healthcare system.

Which students need to receive the influenza vaccine?

Students in Kindergarten – Grade 12 will be required to receive influenza vaccine for the current influenza season for school attendance unless they have a medical or religious exemption.

When do students need to receive the influenza vaccine?

The MDPH Immunization Division had set the deadline of December 31, 2020 for students to receive a flu vaccination unless they have obtained a medical or religious exemption. **The deadline has been extended through February 28, 2021.**

Are there any exemptions to receiving the influenza vaccine?

Medical and religious exemptions are allowable in the state of Massachusetts.

What type of influenza vaccine can students receive?

Any age-appropriate licensed influenza vaccine for the current season fulfills the requirement. This includes injectable and nasal spray vaccine types.

Accessing influenza vaccines

- The Belmont Health Department will have enough flu vaccine available for those without health insurance or anyone that may be underinsured.
- Anyone with health insurance is strongly encouraged to contact local pharmacies and/or their primary care physician to schedule a time to get a flu shot.

For more information and full guidelines on this new requirement, visit:

<https://www.mass.gov/news/flu-vaccine-now-required-for-all-massachusetts-school-students-enrolled-in-child-care-pre>

BELMONT FOOD PANTRY HOURS

The Food Pantry will be **OPEN** on a limited basis for **November & December** from **8:30–10:00 am** for Belmont residents to receive food or to drop off donations. The pantry will **NOT** be open on any **other** days.

SATURDAY, JANUARY 2nd
SATURDAY, JANUARY 16TH
SATURDAY, FEBRUARY 6TH
SATURDAY, FEBRUARY 20TH

Emotional Health Resources

During stressful times it is common to have worries about yourself or a loved one. If you have questions about the types of treatment available, please contact Health Department Social Worker Janet Amdur at jamdur@belmont-ma.gov or (617) 993-2983.

Please remember to take care of your emotional health and help others to do the same. If you need emotional help please also consider making use of the following resources:

- Call 2-1-1 and choose the "CALL2TALK" option.
- The Samaritans helpline operates 24 hours a day, 7 days a week. Call or text their helpline any time at 1-877-870-4673.
- The Disaster Distress Helpline, 1-800-985-5990, is a national hotline, which also operates 24/7, to provide immediate crisis counseling for people who are experiencing emotional distress related to any natural or human caused disaster, including disease outbreaks like COVID-19. This toll-free, multilingual, and confidential crisis support service is available to all residents in the United States and its territories.
- The Beech Street Center is a local resource in Belmont that can help senior citizens address a variety of needs and access to social services.

COVID-19 and Emergency Preparedness

Tropical Storm Isaias as well as increased COVID-19 activity throughout the country have highlighted the need to continue to think about emergency preparedness, as well as preparedness for COVID-19. Please see our Preparedness Tips document on the COVID-19 update page here: <https://www.belmont-ma.gov/home/urgent-alerts/covid-19-information-for-the-town-of-belmont-find-all-updates-here>

Belmont Helps: Ways to Help Our Community

[Donate](#) | [Volunteer](#) | [Ask for Help](#) | [Find Resources](#) | [Request or Help Sew Masks](#)

Belmont Helps, a Winn Brook Parent Teacher Association Committee, is a 100% volunteer organization founded on March 14, 2020 to connect Belmont area community members in need during the COVID-19 outbreak to resources and volunteers. More information can be found at www.belmonthelps.org. Contact belmonthelps@gmail.com or leave a message at (617) 993-0162 for a call back from a team member.

Belmont COVID-19 Informational Call Center and Email

For general COVID-19 questions not specific to the Town of Belmont, all Massachusetts residents encouraged to call the state's 2-1-1 hotline that is staffed by operators 24/7 and with translators available in multiple languages. Residents with questions can dial 2-1-1 from any landline or cellphone or use the live chat option on the [Mass 2-1-1 website](#).

The Town of Belmont has also established a call center to allow residents to ask non-medical questions specific to COVID-19 in Belmont. The call center will be staffed Monday through Friday from 8am to 4pm the number for the call center is (617) 993-2222. Questions can also be emailed to: belmonteoc@belmont-ma.gov. Please call 9-1-1 in the event of an emergency. Calls should not be made to 9-1-1 to obtain information about COVID-19.
