

McLean Land Management Committee  
Meeting Minutes  
Walking tour of site  
June 1, 2007  
8am - 10 am

The purpose of the tour is to walk with Gary Claiborne of Pressley to review existing conditions of virtually all the trails and highlight issues and uses. The group, consisting of some LMC members but not totaling a quorum, and residents walked the trails including the meadows, woodlands, wetland buffers, coal road, etc. Gary had already developed extensive knowledge of the site by his many visits and research investigations. Two questions were posed and Ellen will follow up: 1. Connections to the Belmont Day School - how should these connections be shown (Ellen will contact Day School officials) and 2. Construction materials and other debris - along Coal Road including pipe, curbing, crushed rock, building materials, clothes dryer, etc. in the open space that must be moved. (Ellen will contact McLean )  
No trail recommendations or decisions were made.

Respectfully Submitted,

Ellen O'Brien Cushman  
Chairman, McLean Land Management Committee
