PLANTING NOTES

- All plant material shall be approved by the Landscape Architect prior to arrival on the site.
- All plant material shall conform to the guidelines established by "The American Standard for Nursery Stock", published by the American Horticultural Society.
- No substitution of plant species will be allowed without the written approval of the Landscape Architect. Any proposed substitutions of plant species shall be a plant of equivalent overall form, height and branching habit, flower, leaf and fruit, color and time of bloom.
- The Contractor shall locate and verify all utility line locations prior to excavation for tree pits and report any conflicts to the Landscape Architect.
- All plants shall be placed in their approximate location by the Contractor. The Contractor shall adjust the locations as required by the Landscape Architect. Trees shall be placed first, then shrubs, then perennials and last, groundcovers. Final locations must be approved by the Landscape Architect prior to planting.
- The rootballs of trees shall be planted 3" above adjacent finished grade. The rootballs of shrubs shall be planted 2" above adjacent finished grade. The rootflare of perennials shall be set at the level at which the plant was growing.
- All planting to be done under the full time supervision of a certified arborist, nurseryman or licensed Landscape Architect.
- All plants are to be thoroughly watered after installation, at least twice within the first 24 hours.
- The Landscape Subcontractor shall coordinate with the General Contractor and Site Subcontractor all the requirements for subsoil testing and preparation and testing and placing of approved topsoil and planting soil mixes as described in the specifications. Failure of the site or General Contractor to perform required testing, subsoil and topsoil preparation does not relieve the Landscape Contractor from the requirements of the work as set forth in the specifications.

PLANT LIST

Key	Qty.	Botanical Name	Common Name	Min. Size	Notes:
Trees - Deciduous					
BN	5	Beaula nigra 'Heritage'	River Birch	4.5 - 5' cal	single stem
CB	1	Corylus betulus 'Fastigiata'	Hornbeam	4.5 - 5' cal

PLANTING PLAN 3 of 3

scale: 1"=10'-0"

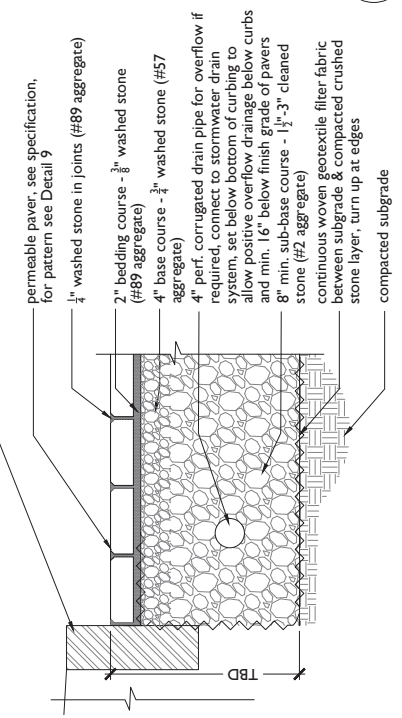

Style A: Brick red pigmented concrete, stamped with brick pattern. Use at pedestrian sidewalks, as noted on plan. Physical color and stamp samples to be provided for approval by Landscape Architect

6 CONCRETE PAVING | STAMPED STYLE A
SCALE: NTS

Style B: Medium grey pigmented concrete, stamped with granite cobble pattern. Use at vehicular drive. Physical color and stamp samples to be provided for approval by Landscape Architect

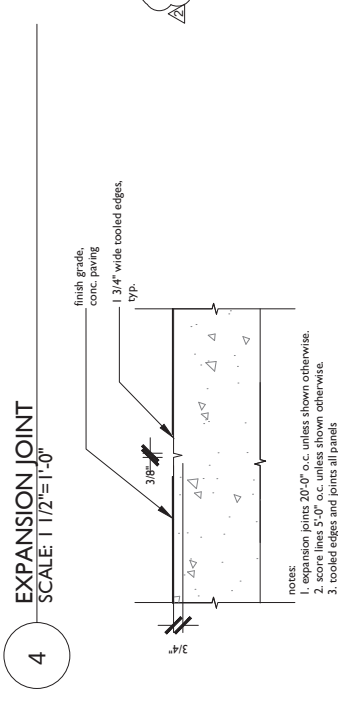

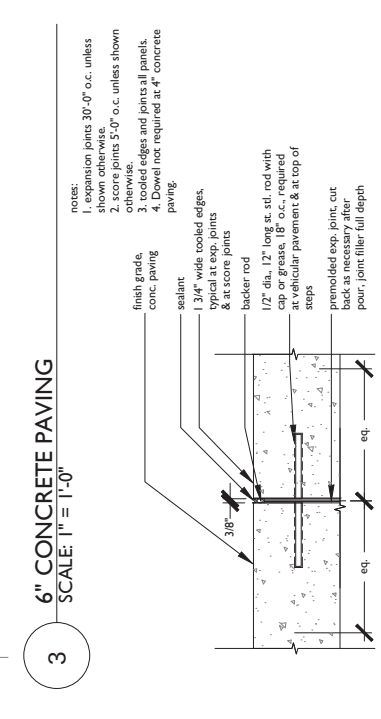

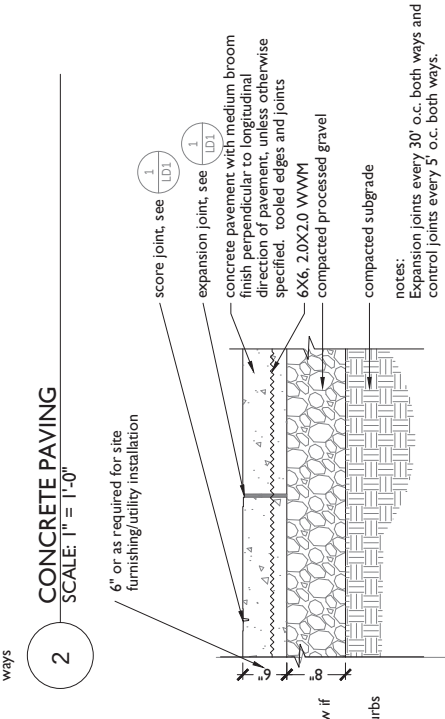

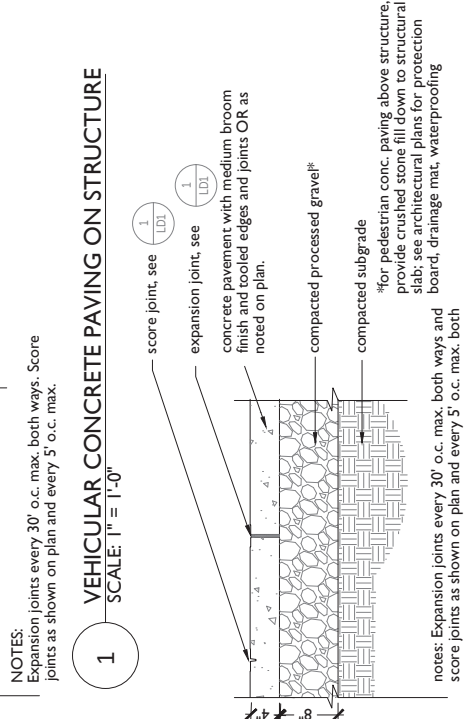

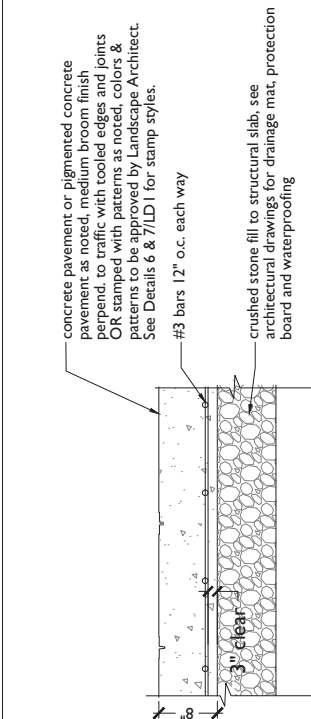

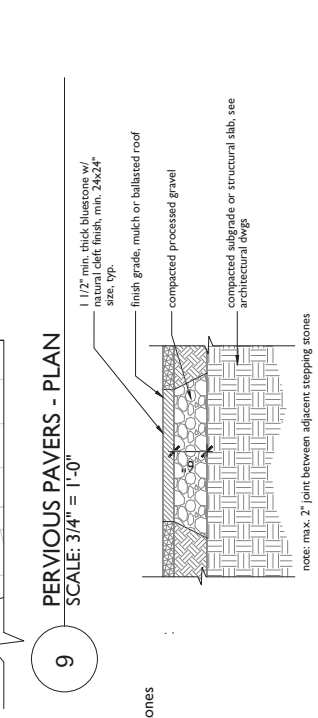

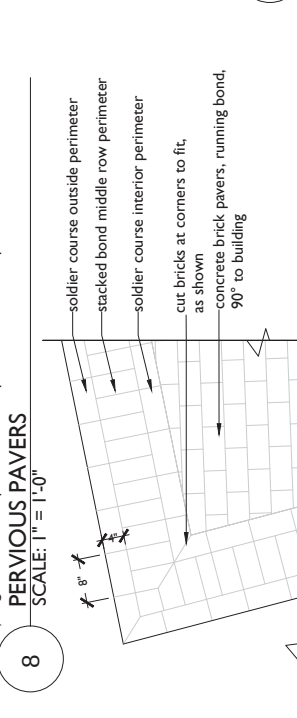

7 CONCRETE PAVING | STAMPED STYLE B
SCALE: NTS

NOTES:

1) Bearing capacity and permeability of subsoil should be evaluated for suitability of application and stormwater management criteria.

2) Edge restraints required at flexible pavement or landscape.
