RE: Concord Avenue at Goden Street and High School Driveway Intersection Traffic Signal Design – Interim Pavement Markings – Additional Services

Dear Mr. Albuquerque:

At the request of Perkins & Will, BSC Group, Inc. is pleased to submit this proposal to provide additional services under our agreement dated 15th November 2018.

The additional services outline below include the development of interim pavement markings and signage plans on Concord Avenue at the proposed Belmont High School Drive, based on the following understanding of the needs of the Client:

1. Existing condition plans provided to BSC did not include pavement markings. BSC will use aerials to create existing pavement markings within the project limits.
2. BSC will prepare interim pavement marking and signing plans showing proposed turning lanes and crosswalks to facilitate proposed traffic operations at the Concord Avenue-Goden Street/High School Drive intersection.
3. BSC will show requisite transition between existing conditions and proposed pavement markings with respect to travel lanes, parking, and bicycle lanes on the plans.
4. BSC will develop interim pavement markings and signage for school pick-up/drop off areas, and MBTA bus stops on Concord Avenue (both directions) at Cottage Street and Oak Street.

BSC, has estimated a budget of Three Thousand Six Hundred dollars (\$3,600) dollars for the above additional services.

Attendance at meetings and field visits are not included in this proposal. If required, these and other services not outlined above, will be performed for an additional fee to be paid on an hourly basis.
