Re: Support for SPS 23-26, October 2nd

Dear Mr. Distler,

We live at 87 Statler Road and totally support the granting of special permit application # 23-26 for 81 Statler Road. The hearing is Monday, October 2nd. The blueprints we saw did not include foundation construction.

93 Statler Road constructed a new foundation in 2018 and in keeping with Town regulations extra measures were taken to prevent the construction from raising the flood level on our property.

Are you able to inform us at this time that the architect has submitted similar plans to address the change in the water table and the probable flooding that will result from an addition of the foundation at 81 Statler Road? Raising the level of their backyard would also have disastrous results and no mention of this was made.

It is our desire only to reaffirm the architect's foundation flood plan; as abutters we feel the SPA 23-26 construction will be a very favorable addition to 81 Statler Road and to our Winn Brook neighborhood.

Thank you for helping us.
